

Monthly Indicators

May 2015

Residential real estate activity comprised of single-family properties, townhomes and condominiums combined. Percent changes are calculated using rounded figures.

The U.S. economy has been pretty even so far this year. Usually when new figures are released, they paint a pretty picture worthy of putting above the fireplace in that purchased new home. Recently, some numbers for the first quarter were adjusted to show a slight contraction in the economy. The initial response from Wall Street was unfavorable, but the correction itself is truly a mere blip. Nobody is predicting that the market will take a sudden turn.

New Listings in Southeast Minnesota decreased 5.5 percent to 763. Pending Sales were up 21.3 percent to 671. Inventory levels shrank 16.6 percent to 2,102 units.

Prices continued to gain traction. The Median Sales Price increased 6.2 percent to \$158,300. Days on Market was down 10.0 percent to 81 days. Sellers were encouraged as Months Supply of Inventory was down 25.9 percent to 4.3 months.

One interesting effect of a weaker-than-expected economy is that the Federal Reserve does not seem ready to raise short-term interest rates during summer, as some had suggested might happen. New projections indicate that rates will remain the same until September at the earliest. The dominant storylines in housing are decidedly not negative these days. Instead, you're more likely to see top sales and luxury living highlighted than the woes of foreclosures and short sales.

Housing Affordability Index

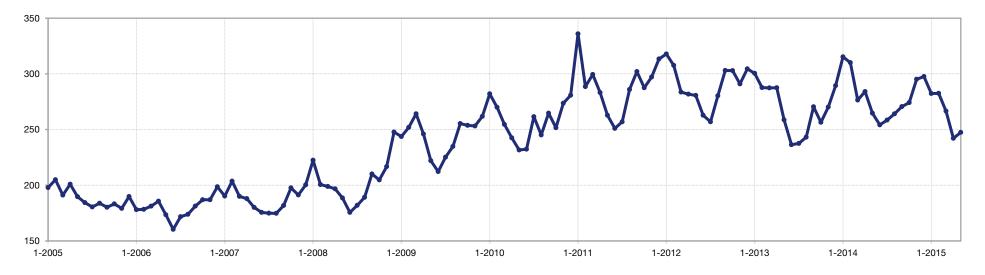

This index measures housing affordability for the region. An index of 120 means the median household income is 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
