

Monthly Indicators

October 2017

Residential real estate activity comprised of single-family properties, townhomes and condominiums combined. Percent changes are calculated using rounded figures.

It has been several months since news cycles have touched upon housing in any sort of sensationalistic headline grab that was common during the boom-and-bust atmosphere of a decade ago. During that tumult, heady price increases gave way to a Great Recession and foreclosure crisis. Then we entered into a period of healing and eventual recovery that we are still enjoying. For residential real estate in 2017, fewer headlines have meant mostly good news.

New Listings in Southeast Minnesota increased 1.3 percent to 477. Pending Sales were down 5.0 percent to 473. Inventory levels shrank 14.3 percent to 1,378 units.

Prices continued to gain traction. The Median Sales Price increased 8.8 percent to \$174,000. Days on Market was down 21.9 percent to 57 days. Sellers were encouraged as Months Supply of Inventory was down 12.9 percent to 2.7 months.

Although inventory levels are low in many markets, there has largely been enough listing and building activity, or at least conversation about future activity, to keep prices from skyrocketing toward another bubble. Low affordability has started to become a recent topic of conversation and is definitely worth watching. But with a healthy economy, level of demand and national unemployment rate, sellers are going to be hard-pressed to lower prices.
